PROFILE

Software engineer with over 7,000 hours of hands-on experience in front-end development.

TECHNICAL SKILLS

- JavaScript/TypeScript
- React/React-native/Next.js
- SCSS/Material UI/Styled components
- Redux/Context/React Query
- Node.js/Python
- Git/Github/AWS
- Mongo DB/MySQL

SOFT SKILLS

- Ambitious
- Learning fast
- Creative
- Communicative
- Teamwork
- Leadership

EDUCATION

Bachelor of Informatics (Jan 2021)

UNIVERSITY OF APPLIED SCIENCE

WORK EXPERIENCE

LECTURER
CodeAcademy   Nov 2021 - Present

- Primary responsibilities include designing course content, teaching classes on front-end development, and providing student mentorship.
- Tech stack: HTML, CSS, JavaScript, TypeScript, React, and Node.js.

FRONT-END DEVELOPER
Exacaster   Mar 2022 - Present

- Key developer for a Customer Data Platform, a telecommunications services web application.
- Leading a Customer Journey project to migrate the platform from PHP to React, enhancing efficiency and usability.
- Tech stack: React, TypeScript, React Query, SCSS, Custom UI Lib.

FULL-STACK DEVELOPER   Mar 2019 - Present
Freelance

- Led the development of a 3D event equipment rental software from scratch. Utilized technologies such as React, TypeScript, Material UI, React Query, React Context, Python, and FAST API. This effort significantly contributed to the company's digital transformation, resulting in a significant 20% increase in revenue.
- Customized WordPress plugins using JavaScript, HTML, CSS, and PHP.
- Developed a construction company website with an integrated indoor estimated spreadsheet, using React, JavaScript, Node.js, MongoDB, and SCSS.
- Created company representation websites using Next.js, JavaScript, and SCSS.

FRONT-END DEVELOPER
10 Speed   Nov 2020 - Mar 2022

- Contributed to the digital transformation of a driver recruitment application resulting in a 30% increase in operational efficiency.
- Developed a mobile application tailored to drivers' needs.
- Enhanced the efficiency of a transportation management system with a new map feature, leading to a 10% revenue increase.
- Tech stack: React, JavaScript, Material UI, React Context for the web applications. React Native, TypeScript, React Query, React Native Paper for the mobile application.

JUNIOR FRONT-END DEVELOPER
Baltic Amadeus   Feb 2020 - Jul 2020

- Spearheaded the development of a web application for Agile Retrospectives, creating the product from scratch and driving its completion.
- Successfully implemented the application into Microsoft Teams following collaborative meetings with their team, enhancing the application's reach and functionality.
- Tech stack: React, JavaScript, Redux, SCSS.
